3. Code of Conduct Standards

The Code of Conduct provides a high-level overview of the expectations that this facility has for its personnel. Because personnel will be responsible for complying with this Code, this facility has adopted the following standards of conduct (“Standards”) that all personnel are expected to follow. These Standards outline and summarize the basic concepts underlying this facility’s Code of Conduct and its Compliance Program (which is described in more detail in Section IV below). These Standards must be carefully reviewed and closely followed by all this facility personnel. Supplemental information relating to these Standards will be provided through periodic formal and informal training and educational programs. Additionally, many Standards are expanded in greater detail in this facility’s compliance standards and policies.

A. Compliance with the Law and High Ethical Business Standards

This facility operates in a heavily regulated industry and is subject to a large number of federal and state civil and criminal laws and regulations. Violation of these laws and regulations can result in harm to the public, severe financial penalties, exclusion from participation in government health care programs (such as Medicare and Medicaid) and – in some cases – criminal fines and/or imprisonment. This facility’s Code of Conduct and Compliance Program are designed to prevent and detect such violations. Accordingly, it is critical that all personnel comply with all applicable federal and state laws and regulations and with all policies and procedures that comprise the Compliance Program.

While one of the objectives of this facility’s Compliance Program is to educate all this facility personnel about the basic requirements of these laws and regulations, this facility does not expect any of its personnel to become experts in these areas. For this reason, where an individual is not sure whether a particular activity or practice violates the law or any of the Compliance Program policies, the individual should not – under any circumstances – “guess” as to the correct answer. Instead, the individual should seek appropriate guidance from his or her supervisor or the Corporate Compliance Officer. This facility personnel will not be penalized for asking compliance-related questions. To the contrary, this facility is intent on creating a culture in which every individual is comfortable asking the questions

necessary to ensure that he or she understands and performs his or her tasks and obligations in full.

Personnel of this facility shall adhere to the high standards of business ethics as set forth in the Compliance Program and in its Code of Conduct, and acknowledge that such compliance is a condition of employment and is a factor that will be considered in his or her performance evaluation.

B. Standards Relating to Quality of Care and Services

This facility is fully committed to providing the highest quality of resident care in accordance with all applicable laws, rules and regulations. As part of this commitment, this facility will ensure that necessary quality assurance systems are in place and functioning effectively.

- ***Quality of Care Principles.*** In keeping with this facility's mission and values, the following quality of care and services principals have been incorporated into this facility's Compliance Program:
 - All residents will receive treatment without discrimination as to race, color, religion, sex, national origin, disability, sexual orientation, source of payment, or age.
 - All residents will receive information that is necessary to give informed consent for any proposed procedure or treatment. This information shall include the possible risks and benefits of the procedure or treatment.
 - All residents will receive considerate and respectful care in a clean and safe environment free of unnecessary restraints.
 - This facility will protect and promote the rights of each resident, including, but not limited to, the resident's right to respect, privacy, a dignified existence, self-determination, and the right to participate in all decisions about their own care, treatment and discharge.
 - This facility will conduct background checks pursuant to federal and state law (which includes, but is not limited to, criminal convictions and/or exclusion from participation in any federal health care program) on all personnel involved in resident care, or who have access to resident's possessions.
 - All individuals employed by this facility will have the proper credentials, experience and expertise required to discharge their responsibilities.
 - This facility will continuously strive toward a culture of resident safety and providing quality medical care to its residents.
- ***Credentialing.*** This facility complies with all applicable federal and state laws, rules and regulations governing the credentialing process. This is a key element to ensuring that this facility provides the highest quality care and services to its residents. This facility has processes in place for the on-going and continuous credentialing and competency reviews of clinical and non-clinical staff. Complying with credentialing and licensure requirements is a necessary component of this facility's commitment to providing appropriate quality of care to its residents.

- ***Mandatory Reporting.*** As part of its commitment to providing the highest quality of resident care and services, this facility complies with all applicable federal and state mandatory reporting laws, rules and regulations. To this end, this facility will ensure that all incidents and events that are required to be reported are done so in timely manner, and will monitor compliance with such requirements. This facility will also comply with and have policies and procedures in place relating to the reporting requirements under the Patient Protection and Affordable care Act. This facility will notify covered individuals of their obligation to report a reasonable suspicion of a crime against any person under this facility's care.

C. Standards Relating to Billing and Coding

This facility is committed to conducting the coding, billing and collection process with integrity. We, therefore, adhere to current coding principles and applicable billing laws, regulations and guidelines to facilitate the proper documentation, coding and billing of claims.

- ***Billing Generally.*** In conformity with this facility's mission and values, bills will only be submitted based upon the resident's clinical condition, services actually rendered, and sufficient and adequate documentation of such services. All personnel responsible for billing will be trained in the appropriate rules governing billing and documentation and will follow all regulations governing billing procedures. Personnel will not knowingly engage in any form of up-coding or any service violation of any law, rule, or regulation. This facility takes all reasonable steps to ensure that our billing software reliably and accurately codes and bills all services according to the most recent federal and state laws and regulations.
- ***Compliance and Federal and State Laws Regarding the Submission of Claims.*** All personnel shall comply with all applicable federal and state laws and regulations governing the submission of billing claims and related statements. A detailed description (i) the federal False Claims Act; (ii) the federal Program Fraud Civil Remedies Act; (iii) state civil and criminal laws pertaining to false claims; and (iv) the whistleblower protections afforded under such laws is provided in Appendix A to this Plan. Personnel will receive training on these laws as part of this facility's Compliance Program and should consult with the Corporate Compliance Officer (who may confer with this facility's legal counsel, as needed) if they have questions about the application of these laws to their job.

D. Standards Relating to Business Practices

This facility will conduct its business affairs with integrity, honesty and fairness to avoid conflict between personal interests and the interest of this facility. This facility will forego any transaction or opportunity that can only be obtained by improper and illegal means, and will not make any unethical or illegal payments to induce the use of our services.

- ***Accuracy and Integrity of Books and Records.*** This facility must keep accurate books, records and accounts and must accurately reflect the nature of transactions and payments. This includes, but is not limited to, financial transactions, cost reports and other documents used in the normal course of business. No false or artificial entries shall be made for any purpose. No payment or other remuneration shall be given or received, nor purchase price agreed to, with the intention or understanding that any

part of such payment or remuneration is to be used for any purpose other than that described in the document supporting the payment or other remuneration.

To this end, this facility maintains and monitors a system of internal accounting controls. This facility records and reports facts accurately, honestly and objectively, and does not hide or fail to record any funds, assets, or transactions.

- ***Gifts and Benefits.*** Personnel are strictly prohibited from offering, giving, soliciting or receiving any gift or benefit for personal gain or inducement. This policy applies to our interactions with providers who refer residents to us or to which we make referrals, and to our interactions with our vendors (including, but not limited to, pharmaceutical companies with which we do business). This policy also applies to gifts or benefits received or offered by residents, their families, visitors, or others. The guiding principle is simple: personnel may not be involved with gifts or benefits that are undertaken: (i) in return for or to induce referrals or (ii) in return for or to induce the purchasing, leasing, ordering or arranging (or the recommending of any of the foregoing) of any item or service.
- ***Conflicts of Interest.*** Personnel must exercise the utmost good faith in all transactions that touch upon his or her duties and responsibilities for, or on behalf of, this facility. Even the appearance of illegality, impropriety, a conflict of interest or duality of interests can be detrimental to this facility and must be avoided. All personnel who are in positions to influence any substantive business decision must complete an annual Conflict of Interest Disclosure Statement, disclosing all direct and familial interests which compete or do business with this facility.
- ***Compliance with Medicare and Medicaid Anti-Referral Laws.*** Federal and state laws make it unlawful to pay or give anything of value to any individual on the basis of the value or volume of resident referrals. This facility does not pay incentives to any person based upon the number of residents admitted, or the value of services provided, nor does this facility pay physicians, or anyone else, either directly or indirectly, for resident referrals. All financial relationships with other providers who have referral relationships with this facility are based on the fair market value of the services or items provided. All marketing and advertising of services are based solely on the merits of the services provided.

The anti-referral laws are set forth in Appendix A of this Plan. Personnel should consult with the Corporate Compliance Officer (who may confer with this facility's legal counsel, as needed) if they have questions about the application of these laws to their job.

E. Standards Relating to Confidentiality

This facility safeguards confidential information regarding its residents, such as individually identifiable health information, and confidential and proprietary information regarding the business of this facility, such as resident lists, development plans, marketing strategy, financial data, proprietary research, and information about pending or contemplated business deals. Inappropriate disclosure of this facility's confidential business information, whether intentional or accidental, may adversely affect this facility.

Due to this risk of harm to this facility, personnel who learn confidential business information about this facility or its residents shall not disclose that information to third parties, including family or friends. In addition, personnel may not disclose such confidential

information to any third party after leaving employment except with the prior written consent of this facility, or as required by applicable law.

4. Compliance Program: Description and Summary

6. This facility has a system for routine identification and assessment of compliance risk areas within this facility through the use of periodic reviews, audits and other practices. As part of that assessment, and in an effort to detect and prevent fraud, waste and abuse, the Corporate Compliance Officer, or a designee, will periodically monitor and/or conduct specific reviews of the following risk areas: business, coding and billing practices; issues relating to quality of care and services; the credentialing processes; compliance with mandatory reporting requirements; and other potential compliance risk areas that may arise from complaints, Helpline calls, risk assessments, and as identified by compliance protocols and elsewhere.
7. This facility has a system for responding to and investigating potential compliance issues as they are raised by personnel or identified in the course of self-evaluations and audits. Corrective action is promptly implemented with periodic reviews to verify successful correction.

The Board will maintain a direct reporting relationship with the Corporate Compliance Officer and receive appropriate reports from the Corporate Compliance Officer and senior management as to the operation of the Compliance Program, identification of potential issues, and the formulation of annual work plans based on appropriate risk assessments. All Board members will receive periodic training, either on a formal or informal basis, as to basic compliance principles (including a review of the fraud and abuse laws and regulations), the Board's responsibilities and the specific risk areas that need to be addressed by the Compliance Program.

Finally, whether or not the identity of any reporting personnel becomes known or is revealed, under no circumstances will this facility take adverse action against personnel who report actual or potential misconduct in good faith and who were not involved in the misconduct in question. Investigations by this facility of reported wrongdoing involving compliance issues will be directed and coordinated by the Corporate Compliance Officer or in some cases by this facility's legal counsel, as appropriate. Personnel are expected to cooperate in such investigations. If the result of the investigation indicates that corrective action is required, this facility will decide what steps it should take to rectify the problem and avoid the likelihood of its recurrence.

Personnel will be subject to disciplinary action, ranging from verbal warnings to termination of employment, regardless of their level or position, if they fail to comply with any applicable laws or regulations, this facility's Code of Conduct, Standards or the Compliance Program standards or policies. - Refusal to cooperate in the investigation of a potential violation; and
- Retaliation against an individual for reporting a compliance violation.

The severity of the disciplinary action, which will be determined by members of senior management (in consultation with the Corporate Compliance Officer and the individual's supervisor), will depend on a variety of factors, including, but not limited to (1) the severity of the violation, (2) whether the violation was committed intentionally, recklessly, negligently or accidentally, (3) whether the individual has committed any other violations in the past, (4) whether the individual self-reported his or her misconduct, and (5) whether (and the extent to which) the individual cooperated with this facility in connection with its investigation of the misconduct.

In addition to taking disciplinary action, this facility will implement other remedial measures, as appropriate, in the event of a violation of any applicable laws or regulations, this facility's Code of Conduct, Standards or the compliance standards and policies.
